

# FamilyKeys

## Medical Records Software

Keep your personal medical information all in one handy safe place!

Keeping personal information available in one handy, safe place is critical. With FamilyKeys, a personal data organizer software program, the member has a simple, convenient, and secure method to organize, record, and store financial, health, and other vital personal information without compromising privacy.

### FamilyKeys:

- Helps ensure family health records (immunizations, surgeries, and genealogy) are accurate and available immediately.
- Saves time when changing or updating doctors.
- Organizes financial services accounts, insurance policies, and retirement plans.
- Includes financial calculators to amortize mortgages, personal loans, interest costs and rates.
- Records full inventory of priceless personal possessions in the event of fire or theft. Prints accurate, complete theft reports and claim data.
- Offers unlimited entries, categories, and locations.
- Provides easy monitoring of personal data to protect against Identity Theft.
